# ABOUT US

We present to you our new catalog. We hope that it will meet your interest, resulting in fruitful cooperation. In our catalog we show flagship products, while our offer includes a wider assortment of different types of wood products in various dimensions.

Karo company is located in Pomeranian Voivodeship in Bytow district in Lipnica municipality. We have been in business since 1994. Since the beginning of the company's existence, we have been engaged in the production of a wide range of garden accessories mainly made of pine. In the range of our products you will find various types of fences, trellises, rollborders, driven fences, stakes, platforms, flower pots, tables, bark in various fractions and many other and interesting products that meet the expectations of even the most demanding customers.

In 2007, we built a new plant, which significantly increased our production capacity. The company covers an area of about 10 hectares, which allows us to store about 200 LKW of finished goods. We sell our products throughout Europe in the amount of about 1500 LKW of finished product per year. Exports account for 90% of the company's total production. Our products are characterized by very high quality in terms of production, impregnation, as well as packaging.

For the sake of high quality and durability, all our products are pressure-impregnated with Korasit KS2, a chromium-free ecological agent, in our own modern autoclave in green, brown and gray colors. KARO has a modern 2023 dryer with a batch capacity of 49 m<sup>3</sup> and a batch length of 6 mb. The dryer is fully automated. All processes are controlled by software from the Czech company KATRES, so the dried material is not subject to

cracking and deformation. The drying process is controlled automatically through the MK-520 control system, which works by analyzing two parameters: temperature and humidity of wood, which also gives us the possibility to impregnate products in the 4th class. The wood used in production comes mainly from the State Forests from certified suppliers.

# ABOUT US

Our company is systematically subject to various audits, resulting in quality certificates. We have PEFC TM certified since 2013. We also carry out SMETA 2P audits - this is an audit methodology to ensure that best ethical practices are met. It covers Sedex's pillars of labor, health and safety, environment and business ethics. We are a creative company and open to current market needs. We focus on development and continuous improvement so that our products increasingly meet the needs of our customers, and taking into account their feedback, we are open to new trends emerging in the market. In addition to producing a wide range of garden accessories, we provide international transportation services. We carry out transport of goods with a capacity of up to 24 t, including oversized. We have the ability to transport hazardous materials, for which we have the appropriate permits ADR, A-schild, SENT, BDO. Our vehicles meet European environmental standards EURO 6 and are properly equipped to carry various types of cargo. We ensure fast and timely execution of accepted transport orders.

In our offer we also have services for the transportation of stacked wood and container transport.

All this is coordinated by a very well-prepared team of people who will provide you with substantive and necessary information at any time.

You can find more about us on our website [www.megier.pl](http://www.megier.pl).

**With hope for fruitful cooperation...**
